-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 28 December 2001.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-20 is/are pending in the application.

DETAILED ACTION

Drawings

1. The drawings are objected to because Figure 1 does not show the PMT 160 (see specification, page 20, line 19 to page 21, line 3). It appears that PTS 158 should be PMT 160 (see specification, page 24, line 22 to page 25, line 13). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in view of R. Rong publication ('Web-based expert system for automated DSL loop qualification').

Applicant admits that the manual troubleshooting of DSL provisioning on the DSL network elements is known (specification, page 2, line 12 to page 4, line 11). Applicant's invention is directed to automating the monitoring of the DSL provisioning (specification, page 4, lines 19-21). Rong teaches to automate the monitoring of DSL provisioning (page 205, 5.1 System Architecture, especially the description on page 206, "allowing the loop qualification process to be part of a larger flow-through provisioning system"), wherein the knowledge base is developed from field personnel (page 207, 5.2 The knowledge base of DSTS). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the knowledge from the manual troubleshooting of DSL provisioning admitted by the applicant into an automated system since Rong explicitly teaches to incorporate the knowledge of field personnel into their automated DSL provisioning monitor.

With respect to claims 5, 13 and 19, Rong does not teach providing the report via e-mail. The users receive the report over the Web (Rong, page 206, Figure 3, Netscape Web server). However, it would have been obvious to include the report as e-mail since a skilled artisan would have been motivated to provide an easily printable and storable version of the report, wherein an e-mail is easier to print and save than a web page.
